Copy and paste the keygen file. When the activation is complete, a new file appears in Autodesk Autocad. Press on "Activate" from that file. That's it! I got the email to activate Autodesk Autocad from a friend who is working in Autodesk. I was also unable to activate Autocad and I got the same email. And I received an email from Autodesk telling me that they have sent me a code for Windows 7 (or something). I opened Autocad and the activation was done, but the software had been already activated and registered in my Autodesk website. It's a miracle but I got Autocad activation working. So my best advice to everyone is: when you get the email, DON'T OPEN THE ZIP. You have nothing to lose if you do. 2:36:34 PM Feb 12th 2012 RPI Superkato I'm pretty sure I had all my Windows 7 Update features turned on. I have not ever had any problems with Autodesk Autocad. 2:48:28 PM Feb 12th 2012 Superkato Guest Joined: 11 Oct 2011 Posts: 0 Went through the same problem and ended up with the same solution. 2:51:18 PM Feb 12th 2012 Anonimo Guest Joined: 05
