What's New in the?

JPG to Word is a lightweight application that can convert any JPG image to DOC format, by using two simple, alternative methods. If the photo contains text, you can use the integrated OCD technology of the software in order to extract the information and save it to an editable Word document. Alternative conversion methods The software features two simple methods of converting an image to a text file, that you can use alternatively. The main purpose of the software is to turn image files that contain text to editable documents. Therefore, it supports images that contain words, numbers and basic punctuation signs. The software features the OCR technology in order to extract recognizable characters and copy them to Word documents. Thus it can easily import text from an image to an editable format. Alternatively, the software can simply embed the image into a document and resize it before saving the output file. Simple size and name settings Each of the conversion methods were designed to facilitate tuning an image to a Word document, while preserving text integrity or image quality. Thus, if selecting the OCR mode, you may specify the language in the text, for a better, more accurate data extraction. By selecting the correct language, you increase the software's chances of recognizing a certain word, when one or more characters are indistinguishable. If you choose to embed a photo to a Word file, you need to also set its size. Thus, the software can automatically resize the image, insert it at its original dimension or you can modify it according to your preferences. You may set it to maximum supported width or height, as well as stretch it to fit the paper. Conversion without quality loss JPG to Word is designed to convert images to DOC files in such way that their quality is maintained. The software allows you to resize the image in order to fit your page layout preferences, or select the language of the text, in case you wish to extract data from the photo. Thus, if the application cannot recognize a particular character, it can rely on grammar or spelling, in order to fill in the gaps. JPG to Word Forum Popular Posts JPG to Word is a lightweight application that can convert any JPG image to DOC format, by using two simple, alternative methods. If the photo contains text, you can use the integrated OCD technology of the software in order to extract the information and save it to an editable Word document. Alternative conversion methods The software features two simple methods of converting an image to a text file, that you can use alternatively.
