Free Download Volvo Navigation Rti 1022 Europe MMM2.Q: Populating ComboBox with data from database I am just starting to learn VB.net and am trying to build a program that will allow the user to update a.csv (comma separated values) file with new values if they wish. I have made a GUI that displays all of the information being added to the file and I have used several different examples on the internet to create the combo box but it's not working. Currently the combobox still stays blank and I can't work out why. 'Declarations Dim sql As String = "SELECT \* FROM [PICS] WHERE [ICMID] = '' & ID & ''" Dim new\_cbo As String Dim cmd As New OleDbCommand(sql, con) Dim rd As OleDbDataReader = cmd.ExecuteReader 'Begin reading the results from the query. Dim cmb As String Dim dt As New DataTable While rd.Read() 'If the first value in the result set is null, then use the next value in the set, 'else use the first value in the result set. cmb = Convert.ToString(rd.Item("Process")) 'Create the combobox new\_cbo = ComboBox1.Items.Add(cmb) Next Since this is my first VB.net program I am sure I have just missed a simple mistake and have done something stupid so any help would be greatly appreciated.
