Anti Virus Scanner For .NET Crack

Anti Virus Scanner For .NET Crack X64 [Latest] 2022

Anti Virus Scanner for.NET is a small library that allows you to virus-scan a file by any.NET language (C#, F#, VB.), PowerShell, F#Script, WSH(JScript, VBScript), and any COM IDispatch client. This library is a wrapper of anti virus software product which you installed on your Windows OS. So, this library does not work if you do not install any anti virus software products on your Windows OS. Features of Anti Virus Scanner for.NET : - Support Win7/Vista/XP - Support COM/WScript/JScript/VBScript/F#Script/PowerShell - Support Multi Language Anti Virus Scanner for.NET Protocols : - Remote Query: When you do remote query, the file or folder that you request will be virus scanned by any anti virus software installed on your Windows OS and the result will be reported back to you in a string format. A: @Morgan This is not a very original idea and it is used by various Virus scanners. It only scans for very simple viruses, such as trojans/worms/spyware, but it's a very nice way to do that, because you don't need to install anything. You can download the library from here: Anti-Virus Scanner for.NET I've been using it for years, without any problem, and with a lot of results.

Anti Virus Scanner For .NET

- simple, easy-to-use, and powerful API for virus scan. - API is easy to use with Microsoft Visual Studio. - support COM IDispatch clients. - support PowerShell, WSH, F#Script. - doesn't require any dependences. - free for commercial use.
