“HyperMotion is a brand new technology for FIFA that lets players truly immerse themselves in the live atmosphere of a match,” said Danny Jordaan, Co-Chairman of the FIFA Council. “We’ve developed the gameplay systems and maps for this generation of FIFA to deliver that ultimate football experience, and our research and development has allowed us to collect and use real data from 22 player movements to create this unique playing experience.” Build on the strengths of the FIFA franchise and world class gameplay features, the Fifa 22 Product Key technology set has been created and refined through the expertise of EA Sports engineers. FIFA 22 introduces a new Player Impact Engine, powered by the new HyperMotion technology, that allows fans to see players’ weight transfer when in contact with an opponent. The physics-based weight transfer will allow players to feel the actual force being applied to their bodies. Not only do match official actions, such as red and yellow cards, now reflect the weight transfer of the players, but standard referees will also be equipped with a FIFA 22 physics system that allows for every call to be accurate and matches to feel more exciting. These new additions to FIFA’s physics engine will also generate more excitement and unpredictability for fans by creating more anticipation when a player misses a penalty kick or when a tackle is made or the ball is stolen. “This is an amazing opportunity for us to be able to work with the FIFA community and use motion capture technology,” said Andrew Wilson, Executive Producer at EA Sports. “We are excited to bring the game’s players to life and truly deliver an authentic football experience.” The new traction animation and Player Impact Engine introduce a range of other improvements that enhance the gameplay experience. This includes new ways to score, tackle and dribble by providing more responsive controls and the ability to perform other actions with more fluidity in game. Check out more gameplay details below as we continue to reveal additional content on FIFA 22's premier modes, Clubs, FIFA Ultimate Team and Seasons. We'll also be sharing FIFA 22 information on FIFA.com and the EA Sports Facebook page! **PURE PASS TO BREAKTHROUGH – Play the way you play** The most significant addition to the gameplay mechanics in FIFA 22 is PurePass (now PURE PASS), the all-new system that lets players play the game exactly how they play on the field. PurePass recognizes
