Gandhi To Hitler movie tamil dubbed in 720p
Gandhi To Hitler movie tamil dubbed in 720p cells. We, therefore, investigated the effect of compound **37** and carvone on the expression of G2/M checkpoint, which is an important regulator of the mitotic process [pone.0086002-Bonne1]. Compound **37** inhibited the expression of cyclin B1, cdc25c, and down-regulated the expression of p-cdc2 (Y15) in a concentration-dependent manner ([Fig. 6] (#pone-0086002-g006){ref-type="fig"}). To further verify that compound **37** induced G2/M cell-cycle arrest, we next examined the effects of compound **37** on the cell-cycle regulators through western blotting analysis. As shown in

[Fig. 6A](#pone-0086002-g006){ref-type="fig"}, the expression of cyclin A2 and phospho-cdc2 (Y15) decreased in a concentration-dependent manner. These results indicated that compound **37** disrupted the expression of cell-cycle proteins and induced cell-cycle arrest at G2/M phase. [Effects of **37** on cell-cycle regulation.] (A) After being treated with compound **37** (0, 10, and 20 μ M) for 24 h, K562 cells were harvested, and then subjected to western blot analysis. (B) Densitometric analysis of western blots for cyclin A2, p-cdc2 (Y15), and cyclin B1. Results are presented as means \pm SD from three independent experiments. **p*
