* **Basic image editing***. In the P menu, click Basic. You see a panel of tools where you can crop, rotate, change brightness, contrast, contrast, and color, and flip or skew an image. You also see tools for removing image noise and sharpening. (When you see the word `_sharp_`, it is telling you to make the image sharper. This has nothing to do with print sharpness, which is discussed in Chapter 9. If a picture looks sharp on a website, it just means that you like it.) So, on Tuesday 27 January, one of our art groups, The Fabulous Fifties & Sixties, celebrated their 1960s at Woodford. It was a glorious sunny day and we caught up with old friends and a few new ones to have an enjoyable afternoon. We are able to work on whatever interests us at that time, so there might have been some knitted crochet around, some painting, some sewing or beading, a bit of card-making or jewellery-making. Before anyone knew what was happening, someone had started the tradition of the Fabulous Fifties & Sixties Watch. The Watch Master was chosen from amongst the members. It became my job to count the number of people and then pop a Fabulous Fifties or Sixties watch onto their wrist. The person in front of me was Dawn Lee, a new member, but I couldn't help but wonder what was going to happen to her in the future! It was a good job Dawn didn't show up until the end of the afternoon or there could have been some Carrying On Parties! We didn't stay long. After a good break, we met again to do some last minute sales and stall decorations. The highlight was selling the Fabulous F
