- The Online Mode Features Online play via dedicated servers. You can connect with the game's other players via asynchronous multiplayer (matching with other players in the distant places). During online play, certain other players, who have not been matched with other players, will be displayed as a random character for you to play against. In asynchronous multiplayer, there will be a range, so you can freely select the location where you wish to fight with others. Furthermore, when you do battle, the strength of your opponent, which is displayed in the form of a symbol, is instantly reflected on your status screen, making the online environment feel more real. - Storyline Players, who intend to defeat the evil forces that threaten the world, will have to enter the fantasy world, where the Elden Ring that will grow with them as they progress through the story is summoned. In this world, where the evil forces and the heroes callously fight for their own goals, the story begins with Vrist, an aged warrior. He is, in fact, a representative of an ancient civilization that uses magic and has passed on their power in your form. Vrist accompanies you, and he will aid you in your confrontation with the corrupt forces that have taken possession of the world. - Style and Combat The player's in-game action will be immediately reflected on the 3D-like visual design, and you will be able to enjoy a game that is fun to play, whether playing alone or with others. The key to success, for example, is the proper use of the sword, which you will be able to freely use. By holding forward to block, move back to follow up, or strike, the sword will become a fighting tool, allowing you to deal the most damage to your enemies. With a battle now being a combination of roleplay and action, the character is now able to fulfill their role of a play. - Above all, Play as You Like The degree of ability of the player character is linked with the amount of gold the player has. This means that for each battle, the character you play will be in their strongest form, and it is possible to use a variety of active abilities depending on the situation. - WEAPON Weapon: A sword, which the player uses to attack. The sword has various forms that will give you various attack characteristics
