Unraveling: A new game for the tome Unraveling is a new game for the tome, a semi-realistic/dark fantasy adventure game based on the manga and anime of the same name. Set in a fantastical version of late-renaissance Italy, the game features a large, open world with a unique puzzle-solving system and a combat and magic system based on dance. The game offers a number of other interesting options like crafting and a lot of parkour/rogue-like gameplay.

----- Last word of the day: "One day I was walking into a bar, and some friends and I were talking about what we would like to do if we had all the time in the world. I started thinking about all of the cool things I could do, and I realized that I had never heard of any game for the tome that could let you do things like create your own monster. So, I started working on it."

Description: The Far East Trading Company (FETCO) is a company owned by Broderick Malloy. The police captain is his trusted lieutenant and employee. Tommy Mooney, the owner of one of the most popular casino brothels in North Las Vegas, is running prostitution rackets with Broderick Malloy. I need a game that can be played as a first-person shooter (FPS) with a sexy boss. The game is not a mod for a mod. I just want someone to make a full game for the PC as a 1st-person shooter that you play as Broderick Malloy. It can have a dialogue option to play as Tommy Mooney or Broderick Malloy and the text in dialogue should be accurate to the game. Can you help me?

Facebook Inc has been working to end the apparent harassment of a charity campaigner who has been targeted with online abuse and threats against her life, her supporters and her family. Former Google engineer Mimi Lee was the victim of a global digital assault aimed at silencing her campaign to stop the planned redevelopment of the Ngapali Beach Resort in Myanmar's Rakhine state. More than two months after the offensive – described by one of Lee's supporters as "terrorising" and "intimidating" – the social media giant has still failed to take action. Last week, Lee accused Facebook of turning a blind eye to the threats, resulting in her receiving a Facebook Messenger message saying her account had been "disabled due to violations of Facebook's Terms of Service". "I am currently unable to see messages, and I can't access any messages I might have sent," she said. "My page has been disabled as a result." Two weeks earlier, on 12 June, Facebook said it had removed an image of her that appeared to violate its policies around hate speech. The company has declined to comment on its investigation. In emails seen by the Guardian, one of Lee's supporters appealed to Facebook to reinstate her account and accused the company of protecting those responsible for bullying her. "A Facebook account that has been under persistent threats of violent and deadly reprisals for over two months is a concerning situation which needs immediate attention from your company," the email said. Facebook said its policy requires it to remove content

12 Aug 2018 12:33:07 +0000899219By: Vlad KadachiThe CPU?GPU PARTITION DEVICE MARSHALL IN JACKS00 In this demo guide you will find step by step instructions to install your own choice of external storage device into a JACK server. I used the following non-limiting example as it comes standard with JACK and I split it into two partitions: [b]NVIDIA GTX 1080 GPU (Onboard)[/b] [b]SAMSUNG 256GB USB 3.1 REVERAND (External)[/b] Install NVIDIA CUDA Toolkit GPU Support The environment can get messy after you’ve installed CUDA Toolkit 3.1 with NVIDIA drivers earlier than that of your NVIDIA graphics card. A clean unix-like operating system with bash is not required, just make sure you have a compiler and C++, you won’t be needing a compiler for this. Open a terminal and change the path in bashrc to see it. Type the following in your terminal: root’s path=/... After you’ve run the installer, you’ll have to manually install the driver for your card. You can do so by typing: sudo nvidia-375 This is the example of a GTX1070 onboard graphics card. Install GPU Support Simply login to your computer and keep in mind that even though the following command references a \$(CC) compiler, you will need to have an NVIDIA CUDA Compiler installed in order for the install of the Open Source AMD Compute Library such as AMDGPU-PRO to succeed. sudo apt-get install build-essential sudo apt-get install ncurses
