Although my codes are copied and followed from another post the implementation is not working. I am coding this in oldschool CSS and Javascript, because of which I am trying to learn flexbox. I am getting the following error (some of it is in Swedish): TypeError: e.target is undefined I have tried to fix this by going to github.io and copy and pasting the codes (and made sure that they are properly connected). I have also tried on my localhost to but also get the same error. Here is my code: 

```
function ring() { var b = document.getElementById('b-box'); var a = document.getElementById('a-box'); b.removeAttribute('style'); a.removeAttribute('style'); } function toggleListeners()
```

"I've been wearing the mask for the last seven years." The last seven years have been a roller coaster of a ride for the 38-year-old Toronto native. He won his first world championship for Team Canada in 2010, and while he enjoyed a number of good moments between '10 and '11, his breakthrough season of '11 never happened. A broken jaw cost him the opening round of the 2011 IIHF World Championship. Having

played on "Canada's best five" his entire career, though, he did eventually find his way back to the national team. "I actually went to Russia, and I had a great time," says Parsons. "I came out of it stronger, having had the chance to play in a different country. That showed the team that I am able to have success in a different culture. When I came back, I said I'm going to go out and have a good tournament. I think it's a really big step. c9d1549cdd
