Surgical correction of symptomatic nasal valve collapse with spreader grafting: a preliminary study. To assess the efficacy of spreader grafting in the treatment of nasal valve obstruction and to evaluate subjective improvements in patients' symptoms after surgery. Prospective study. Tertiary rhinology outpatient clinic. A total of 23 patients (21 female and 2 male) who underwent spreader grafting between 1998 and 2000 to address nasal valve obstruction. Preoperative and postoperative assessment with visual analog scale, endoscopic examination, and a questionnaire. A subjective decrease in the severity of nasal obstruction and improvement of nasal breathing during activities of daily living. Follow-up was uneventful in 21 patients, with an average follow-up of 7 months. Postoperative endoscopy revealed an increase in the amount of lateral nasal cartilage in 20 patients and softening of the mucosa in all cases. All patients perceived improvement of their symptoms after surgery, even if "good"

outcomes were significantly associated with a good preoperative degree of nasal obstruction. Spreader grafting seems to be a simple and effective procedure in the treatment of symptomatic nasal valve collapse. It results in a significant objective and subjective improvement in the quality of life. Congress is currently seeking to amend the War Powers Act to restrict U.S. involvement in an all-out conventional war in Syria. On Thursday, Senate Armed Services Committee Chairman John McCain (R-AZ), ranking member Jack Reed (D-RI), and Marco Rubio (R-FL), reintroduced legislation to repeal the 2001 Authorization for the Use of Military Force (AUMF) passed immediately after the September 11, 2001 attacks. The bill would require the president “to begin withdrawing United States Armed Forces from hostilities in Syria without further Congressional authorization when the President and the Congress agree on a course of action.” The bill would establish a deadline of 90 days in which the president must, upon a 60 vote threshold in the Senate, submit either a further declaration of war or a request for further authorization, or a report that Syria is in a state

of open hostilities. Should the commander in chief not get the required votes for war by the 90-day deadline, he or she “shall withdraw United States Armed Forces from hostilities in Syria.” The amendment prohibits any U.S. military involvement in Syria’s civil war, even if the United States, along with its allies, are targeted by a foreign government or terrorist organization. Only in this case would Congress have the
