IGO Primo 2012 v.9.6.7 for symbian.torrent IGO Primo 2012 V.9.6.7 For Symbian.torrentQ: How to get fields from queryset before saving I have two models: class Item(models.Model): user = models.ForeignKey(User, related_name='items') title = models.CharField(max_length=50) class Profile(models.Model): user = models.ForeignKey(User, related_name='profile') items = models.ManyToManyField(Item, related_name='profile_items') I want to add items to profile.items if profile.user = user. Then I have to save the profile. item = Item.objects.create(title='Foo') profile = Profile.objects.create(user=user, items=item, title='Bar') If the user doesn't have items in the items field of the profile yet, I want to add them as soon as the instance of profile is saved. How can I get the profile before saving it? I have tried Item.objects.filter(pk=profile.id).select_related('user') But that returns the profile data along with the additional Item field. I only want to return the profile data. A: It sounds like you want a post_save signal on your Profile object. First make sure that you have the related_name on your profile.items field: profile_items = models.ManyToManyField(Item, related_name='profile_items') Then define your signal:
